

Droop Arlight

Droop series aims to use the potential of LED light in pendant light fixtures. The product offers the flexibility to adjust the height of the light source in the space, answering the different needs of individual offices, work stations, stores, restaurants and foyers etc. Its unusual, silhouette creates a gentle shape and thanks to the constantly improving LED technology, the lit area up is expanded up to 75cm in diameter without losing the product's slender look.
