

## Deep Series

### Arlight

Deep series features an industrial looking design, with a combination of different colour options creating a softer aesthetic. The open structure is a clear reference to the industrial side of Deep and the differing 'hat' options, flat and level, provide choice and means that Deep can be used in different settings, including restaurants, cafés, stores and supermarkets. It provides significant reduction in maintenance cost thanks to the long life of LED. It also has the advantage of using a PAR38 LED bulb which has an integrated control gear.
